

IT OPERATIONS INCIDENT REPORT

MATRIX GROUP GLOBAL LLC • ENTERPRISE INFRASTRUCTURE LOG

Incident ID	INC-2026-103	Severity Level	P2 - High
Incident Title	Automated Warehouse ERP Sync Failure		
Reported By	Carlos Mendez	Role / Department	Logistics Supervisor (Supply Chain Operations)
Log Date	May 30, 2026		

1. INCIDENT SUMMARY & OPERATIONAL IMPACT

Real-time inventory synchronization halted between the regional fulfillment center and the central enterprise resource planning (ERP) system database.

2. ROOT CAUSE ANALYSIS (RCA) PARAMETERS

An unannounced database schema modification locked the primary transaction records, creating an unresolvable data format validation loop.

3. MITIGATION & RESOLUTION PROCEDURES

Rolled back the database schema configuration to the previous stable state and initiated a manual background reconciliation task to push delayed freight data.

This file represents an authorized technical record. Post-incident monitoring tasks are automatically activated for the subsequent 72 business hours.
