

IT OPERATIONS INCIDENT REPORT

MATRIX GROUP GLOBAL LLC • ENTERPRISE INFRASTRUCTURE LOG

Incident ID	INC-2026-105	Severity Level	P1 - Critical
Incident Title	HQ Core Switch Network Outage		
Reported By	Liam Brookes	Role / Department	IT Helpdesk Specialist (Technical Support)
Log Date	May 30, 2026		

1. INCIDENT SUMMARY & OPERATIONAL IMPACT

Physical and wireless network connectivity dropped entirely across Floors 2 and 3 at corporate headquarters, taking printers and internal local storage servers offline.

2. ROOT CAUSE ANALYSIS (RCA) PARAMETERS

A catastrophic hardware power supply failure occurred within the secondary core switch stack, causing an internal cascading routing loop.

3. MITIGATION & RESOLUTION PROCEDURES

Bypassed the faulty hardware module entirely, deployed a pre-configured spare backup switch from storage, and verified standard network transit frames.

This file represents an authorized technical record. Post-incident monitoring tasks are automatically activated for the subsequent 72 business hours.
