

IT OPERATIONS INCIDENT REPORT

MATRIX GROUP GLOBAL LLC • ENTERPRISE INFRASTRUCTURE LOG

Incident ID	INC-2026-107	Severity Level	P1 - Critical
Incident Title	Clinical Trial Telemetry Drop		
Reported By	Dr. Aris Thorne	Role / Department	Clinical Research Director (Medical Operations)
Log Date	May 30, 2026		

1. INCIDENT SUMMARY & OPERATIONAL IMPACT

Real-time patient monitoring telemetry feeds dropped suddenly during an active laboratory sample group monitoring run.

2. ROOT CAUSE ANALYSIS (RCA) PARAMETERS

An outdated firmware version on the edge gateway appliances caused an unhandled memory leak, forcing a hardware crash under high data volume conditions.

3. MITIGATION & RESOLUTION PROCEDURES

Performed hard hardware reboots on the affected edge appliances and immediately deployed the verified stable security patch framework across the network cluster.

This file represents an authorized technical record. Post-incident monitoring tasks are automatically activated for the subsequent 72 business hours.
