

IT OPERATIONS INCIDENT REPORT

MATRIX GROUP GLOBAL LLC • ENTERPRISE INFRASTRUCTURE LOG

Incident ID	INC-2026-109	Severity Level	P1 - Critical
Incident Title	Staging Cluster Database Breach Alert		
Reported By	Siddharth Mehta	Role / Department	Cloud Architect (Infrastructure)
Log Date	May 30, 2026		

1. INCIDENT SUMMARY & OPERATIONAL IMPACT

An automated intrusion protection system flagged suspicious outbound data transmission behavior within the isolated development staging sandbox cluster.

2. ROOT CAUSE ANALYSIS (RCA) PARAMETERS

An exposed configuration port was compromised by an external scanning tool using common default authentication variables.

3. MITIGATION & RESOLUTION PROCEDURES

Isolated the virtual machine immediately from the main network loop, terminated the compromised session layers, and updated firewall parameters to drop public traffic.

This file represents an authorized technical record. Post-incident monitoring tasks are automatically activated for the subsequent 72 business hours.
