

IT OPERATIONS INCIDENT REPORT

MATRIX GROUP GLOBAL LLC • ENTERPRISE INFRASTRUCTURE LOG

Incident ID	INC-2026-111	Severity Level	P2 - High
Incident Title	Freight Routing GPS Timeout		
Reported By	Marcus Thorne	Role / Department	Operations Manager (Logistics)
Log Date	May 30, 2026		

1. INCIDENT SUMMARY & OPERATIONAL IMPACT

Active fleet telemetry monitors failed to receive location parameters from regional delivery trucks, complicating line haul dispatch tracking.

2. ROOT CAUSE ANALYSIS (RCA) PARAMETERS

A global cloud provider tracking API suffered an outage, dropping location update pings across multiple tracking endpoints.

3. MITIGATION & RESOLUTION PROCEDURES

Switched tracking interfaces to a secondary redundant location fallback service, maintaining fleet visibility until the primary API normalized.

This file represents an authorized technical record. Post-incident monitoring tasks are automatically activated for the subsequent 72 business hours.
